

OUTLOOK

VOLUME XXV, NUMBER 2

VILLAGE OF MCFARLAND NEWSLETTER

MAY 2016

Changes Explored for Outlook Newsletter

The Village of McFarland is currently discussing upcoming changes to the Outlook newsletter. Over the summer months, the Communications & Technology Committee and Village staff will evaluate the current Outlook and explore alternative ways to get information out to the community.

While the Outlook will still be produced, how often and the type of content will be up for discussion.

How you can help

What we need from you are your thoughts on the Outlook.

- Is the information in the Outlook valuable to you?
- What sort of information would you like to see?
- Would you prefer the information electronically versus a paper copy?

Please contact the Communications & Technology Department at 838-6717 or email cable@mcfarland.wi.us to share your thoughts on the newsletter changes you'd recommend.

Emerald Ash Borer (EAB) Spreads to McFarland

EAB continues to spread throughout southern Wisconsin. Recently, it was discovered on the northern edge of McFarland.

Based upon this most recent discovery, the remainder of ash trees in the Village are at risk. Village residents should consider taking action if they have an ash tree on their property. The Village does not

We want to hear from YOU! Village Comprehensive Plan Survey

The Village of McFarland is preparing a comprehensive plan to guide future community growth and change. We encourage you and other members of your household to fill out a survey that will help us gauge community priorities.

Please take 10 to 15 minutes to fill out the survey which can be found by visiting the following link:

www.surveymonkey.com/r/McFarlandPlan2016

No computer? No problem! Hard copies of the survey can be found at the Village Municipal Center and E.D. Locke Public Library by contacting us at 838-3154.

To receive more information on the Village's Comprehensive Plan:

- Visit www.tinyurl.com/McFarlandPlan2016
- Call 838-3154
- Email community.development@mcfarland.wi.us

It's easy and will take only 10-15 minutes of time.

Community Invited to Complete the McFarland School District Survey Online

Over the last few months, a dedicated team of volunteers has worked together to create a potential facilities plan for the McFarland School District. It is now time to hear from the community to understand your perspective. What do you like about the plan? What are your concerns? Help shape the future of McFarland by sharing your thoughts.

Log on to: <http://bit.ly/mcfarlandsd>

In a few weeks, you will be invited to join the second step in this process — to review and help prioritize a selection of thoughts by assigning stars to the ones most important to you. This will help the district get a sense of the shared values and priorities of the community. Please note that during this step, your thoughts will be shared with others, but your name will be kept confidential.

Privileged to help.

We're honored to serve this community for 33 years.

My staff and I look forward to many more with you. Thank you for your continued support and business.

Get to a better State®. Get State Farm.

Board of Review Meeting in June

Do you have a concern about your assessed property value? The McFarland Board of Review hears objections to assessments of property values from individual property owners and determines whether the assessor's valuation is correct. The Board has the power to raise or lower property valuations if they feel such adjustments are in order.

The Board of Review will be meeting at the McFarland Municipal Center Tuesday, June 7 from 9–11 am. If you wish to appear, you must make an appointment by calling the Village Hall at 838-3153 by 4:30 p.m., June 3.

Springtime Reminders For Your Property

As you look around your yard this spring please be mindful that no person shall store or accumulate unsightly items such as unlicensed or inoperable vehicles, commercial trailers or trucks, junk, salvage or rubbish on their property. Building materials, construction or earth moving equipment not being used on a permitted building project, is also not allowed. Storage of recreational vehicles or boats is allowed in an enclosed structure that conforms to the zoning requirements of the district. If indoor parking is not possible, and there is no space in the rear or side yard, storage is allowed on a hard surface or well drained gravel surface. Recreational vehicles cannot be used as living space. Please refer to your local subdivision restrictions and covenants for other requirements specific to your neighborhood.

For more information on Village Ordinances you can go to our website at www.mcfarland.wi.us. Please remember those who violate these ordinances can be fined.

Summer Construction Projects around Village

It will be another very active year in 2016 for construction projects in McFarland. The projects are as follows:

- Broadhead Street – Replacing water main and services. In addition, some storm sewer and catch basins will be added. Broadhead Street will be widened with new curb and gutter along the entire length to accommodate one traffic lane and one bike lane in each direction. On-street parking will be included from March Road to Alben Avenue. Following the utility work, the street surface will be removed and restored with a new gravel base. New concrete curb and gutter and driveway approaches will be installed followed by asphalt pavement. Grass areas will be restored with topsoil, fertilizer, seed and mulch. Each side of Broadhead Street will have either a sidewalk or a path.
- Alben Avenue – Replacing water main and services. The street will be excavated to install the new water main. It will be necessary to remove and replace short length of curb and gutter in front of each home to connect new water services from the new main and to existing water services behind the curb. The existing asphalt will be pulverized, graded smooth and new asphalt pavement will be placed from Broadhead Street up to the intersection at Scott Street.
- Crack Filling and/or Seal Coating Projects: Juniper Ridge (Holscher Road to Red Oak Trail), Black Walnut Drive, Leanne Lane (Black Walnut to Broadhead Street), Glenway Street (Broadhead Street to Curtis Street), Glenway Street (Broadhead Street to Osborn Drive), Park Street (Glenway Street to End), Curtis Street (Leanne Lane to Chestnut Lane), Chestnut Lane (Black Walnut Drive to Sauk Lane), Sauk Lane (Chestnut Lane to Glenway Street), Cardinal Drive (Sauk Lane to Curtis Street), Wellington Circle (Marsh Road to End), Wentworth Circle (Siggelkow Road to End), Forest Ridge Court (Country Walk to End), Wild Flower Court (Country Walk to End), Hawk Crossing (Country Walk to End), Wood Crossing (Country Walk to End), Country Walk (Holscher Road west to new asphalt), Mourning Dove Drive (Country Walk to Hidden Farm Road), Bird Song Court (Mourning Dove Drive to End), Hidden Farm Road (Holscher Road to Elvehjem Road), West Open Meadow (Hidden Farm Road to End), East Open Meadow (Hidden Farm Road to End), Terminal Drive (Siggelkow Road to Highway 51), Bremer Road (Erling Avenue to Lake Edge Road), Lake Edge Road (Bremer Road to South Court), South Court (Lake Edge Road to Overlook Drive)
- Lewis Park Shelter – Reconstruction of a new shelter, including a new parking lot.
- Lower Yahara Trail Extension – New path installation from McDaniel Park to Siggelkow Road, east on Siggelkow Road to Terminal Drive. Siggelkow Road will be re-reconstructed, including new water main from Terminal Drive to Erling Avenue.

Emerald Ash Borer, Continued from Page 1

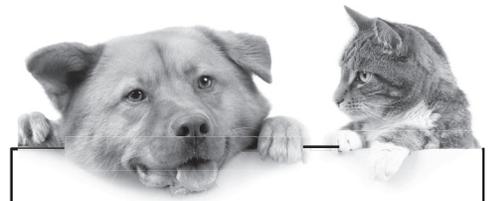

evaluate the condition of private ash trees.

Residents should contact a local arborist or tree care company for assistance. Information on EAB, EAB treatments and other EAB related articles are available for residents to pick up at the Village of McFarland Department of Public Works located at 5115 Terminal Drive during regular business hours. Articles will also be posted on the Village website at www.villageofmcfarland.com.

Please contact the Department of Public Works at 838-7287 with any questions about EAB or your ash tree.

Village Grass and Weed Height Ordinance

Residents in the Village are required to maintain their property and keep lawns mowed so grass and weeds heights do not exceed eight (8) inches. McFarland Municipal Ordinance Sec. 20-26 states that if after five (5) days from being notified that a property is in violation of the Grass Heights Ordinance, the Village may mow the property and bill the owner for the mowing. Property owners can also be cited for each and every day the property was in violation. First violations are not less than \$50.00 per day. If a property owner is cited a second time in that year, property owners can be cited not less than \$100.00 nor more than \$300.00 beginning with the day the second or subsequent notice is served. Fines can be easily avoided by abiding by the ordinances set within the Village and maintaining your properties or hiring someone to do so throughout the growing season.

Pet Ordinance Reminder

The Village would like residents to be aware of a requirement that pertains to dogs and cats.

The owner or person in charge of the animal must immediately remove any feces deposited by the animal on public or private property. This is important not only for public nuisance and public health reasons, but also to reduce the environmental impacts of having this harmful nutrient from this material carried to bodies of water by surface run-off.

E. D. LOCKE
PUBLIC
LIBRARY

Rubber Duck Club: Summer Reading for All Ages

This year the E.D. Locke Public Library is introducing a new Summer Reading Program designed for its littlest of readers: The Rubber Duck Club. Designed for children age's birth through four years, this program aims to include our littlest readers in the summer library programming. Participants will complete and turn in activity bookmarks twice (on or after June 27 and on or after July 25) for age appropriate program prizes including the final book prize and medal.

In addition to The Rubber Duck Club, the library is going to be offering two weekly storytimes starting June 13 and running through the end of the program. New this summer is "Toddler Mondays" which will be a drop-in storytime on Mondays at 10:30 a.m. geared just for toddlers. This program will be a mix of baby lapsit activities and toddler movement programming. Little minds will learn, play, and explore with stories, fingerplays, dancing, and songs. Preschool Storytime continues through the summer on Tuesdays at 10:30 a.m. All ages are welcome to come to this program which is designed with preschool activities, fun stories, finger plays, songs, and adventure.

"On Your Mark, Get Set ... READ!" with E.D. Locke Public Library

This summer's library program at the E.D. Locke Public Library is packed with fantastic family activities and performers as well as our awesome summer reading program. This year's program theme is "On Your Mark, Get Set ... READ!" Registration for the summer reading

program starts June 1 and runs throughout the program. This year participants will not only complete reading logs to earn fabulous prizes provided by local businesses but they will also get to vote for their favorite charity at each stage in our "Race for the Gold" incentive. The library has chosen three local charities to earn votes from participants: The McFarland Food Pantry, Dane County Humane Society, and Habitat for Humanity. These charities will be in the "Race for the Gold" where the charity with the highest votes at the end of the program gets the Gold Prize Donation of \$100, second highest will receive a Silver Prize Donation of \$75, and the third highest will receive a Bronze Prize Donation of \$50.

In addition to the reading program, the library has also lined up some fantastic performers and programs for the summer. We kick off our Summer Library Program June 17 with food, fun, crafts, and a return appearance by the ever loveable Soda Pups! Those loveable pups are back and ready to show their athletic prowess as well as share important dog safety tips.

Other Family Fare Performers include Brad Wendt's "Sportacular Flying Disc Show" June 23, Corcoran Puppets June 30, MMOCA's Art Cart EXTRA! July 9, UW IceCube Project July 14, and Art in a Suitcase July 21.

The program will celebrate its Grand Finale July 28 with activities, snacks, and a performance by Duke Otherwise. Prepare yourself for a zany time of dancin' and singin' lead by songwriter/guitarist "Duke Otherwise." Laugh and enjoy yourself as he shares his original catchy tunes and stories.

This and so much more is going on this summer at the E.D. Locke Public Library. Check our website at www.mcfarlandlibrary.org or stop by the library for more information.

Summer Library Program Youth Volunteers Needed

The E.D. Locke Public Library is looking for youth volunteers to help during this year's Summer Library Program. Teens can volunteer to help with different activities in the library including: helping people register for the reading program, assembling and handing out prize bags, craft preparations, help during programs, and more. Information and registration for volunteering can be found at the library website www.mcfarlandlibrary.org under the programs tab or stop in the library to talk with the Youth Services Librarian. Orientation meeting will be on Monday, June 6 at 4 p.m. Snacks will be provided.

Teen Trailer Workshop

This summer the E.D. Locke Public Library will take part in a Teen Book Trailer Contest sponsored by the Beyond the Page Grant. The Teen Book Trailer Contest challenges teens between the ages of 12 and 17 to create a trailer for a book that has made an impact on their lives and contributed to the growth and influence of teen literature on society. These trailers will then compete for three prizes which will be announced by Oct. 10. The prizes are: Best in Show – iPad Mini 2; Most Creative: \$50 Amazon gift card; Funniest: \$50 Amazon gift card.

Our library will be hosting the Teen Book Trailer Stop-Motion Animation workshop July 13 at 4 p.m. lead by local filmmaker and instructor Frank Caruso. Mr. Caruso will touch on different aspects of filmmaking including storyboarding, storytelling, and set creation. Trailers created during this workshop can be entered in to the contest as well as featured during the future Book trailer Festivals.

As part of Teen Read Week in October, each partner library will host a Book Trailer Fest to show trailers from their library along with the other libraries. The community is welcome to the Fests to celebrate the creativity of teens and the books that inspired them. Registration for this program will be available in early June through our website www.mcfarlandlibrary.org.

Meet Heather Kent

Heather Kent

Tell us a little about yourself.

I currently live in Waterloo with my husband Mike and our 17-year-old son Tim. Mike has three other boys that are in various stages of college and occasionally stay with us depending on what is going on in their lives. I have a BA in Elementary Education from Edgewood College and received my MLIS from the School of Information Studies at UW Milwaukee. When not at work I am part of Penguin Productions Theatre group which performs in Watertown and Lake Mills.

What is one of your favorite parts of your job?

When there are connections made with the library and the community it serves. I love seeing people utilize the library resources. One big goal/love of mine is getting children and youth connected with a life-long love of reading and seeing families connecting through activities in the library (whether it be through programming, story times, or just knowing this is a place for them to come together.)

Other than librarian, what is one of the most interesting jobs you've had?

When I was a teenager I worked as a box office manager for a summer stock theatre outside of New York City. It was a great opportunity to see shows that were being tested out before going to the city as well as meet some fantastic people.

What kinds of hobbies and interests do you have outside of work?

I love to read (of course!), bike ride, highland dance, play piano and write.

What is your favorite book or what do you like to read?

About 50 percent of what I read is YA materials — not because I have to but because there are some really great authors writing for that age group. I love anything by Marie Lu and Marissa Meyer. If you haven't read the Lunar Chronicles do it now.

What is one thing you couldn't live without?

Probably my day planner. I could probably live without it — but I would not know where I was going next.

Chess, Anyone?

Ever wonder what pins, forks, skewers and batteries have to do with each other? Do you enjoy strategy and tactics games? Ever desired to be awarded the title of Grandmaster? Have an old chess board that you don't know how to use and were ready to pawn?

E.D. Locke Public Library has come to the rescue. We now have a chess club meeting the second Sunday of every month in the community room at the library from 1-3 p.m. Even if you know little about the game of chess, but had always wanted to learn, come join us. We have community volunteers waiting to teach you the game. The club is open to all ages, and all abilities. Children under 7 should be accompanied by an adult. If you want to come play a friendly game with fellow enthusiasts, we can accommodate that wish.

We have some chess sets available, but appreciate any donations of gently used games. And, if you have a favorite board you like to use, bring it along to play.

Next meetings: Sunday, June 12;
Sunday, July 10; No August meeting;
Sunday, Sept. 11.

Yard Waste and Brush Drop-Off Site

The yard waste/brush drop-off site located at the Public Works Facility at 5115 Terminal Drive accepts yard waste and brush from McFarland residents only. The operating hours of the yard waste/brush drop-off site are 7 a.m.–7 p.m., seven days a week. The site will open approximately April 1, weather dependent.

There are separate dumping areas for yard waste and brush. Please stack your material as close to the back wall as possible to conserve space.

What is accepted:

- Leaves
- Grass Clippings
- Thatch
- Non-woody Plants
- Brush must be no larger than 3 inches in diameter and 10 feet in length

What is not accepted:

- Rocks
- Concrete
- Metal
- Stumps
- Base Root Balls
- Sod
- Dirt
- Lumber

Oil Drop-Off Site

The Village of McFarland continues to provide the service at our oil drop-off location for collecting oil filters, plastic oil containers and antifreeze.

If Village residents have any questions, please contact the Public Works Department at 838-7287.

**The Public Works Department
can be reached at 838-7287.**

Give Your Lawn a Checkup Before You Fertilize

After a long winter under a deep blanket of snow, your lawn is finally visible again, matted and brown. You may be thinking about spring cleaning and maintenance, including an application of fertilizer to ensure lush, green grass this summer. Before you fertilize, test your soil to see what your lawn needs. You may be wasting your time and money, and sending excess nutrients to local waterways where they feed algae and damage fish habitat, if you don't test first.

If your soil already has the right balance of nitrogen, phosphorous and potassium, you don't need to fertilize. To figure out your lawn's needs, send in a soil sample to be tested. The University of Wisconsin has a soil testing lab right in Madison. Any Wisconsin soil can be submitted for analysis at a cost of \$15/sample. A sample is two cups of soil collected in multiple places from the top 4 inches of your lawn. The laboratory will return a report for each sample indicating soil pH, percent organic matter, phosphorus and potassium analysis. It will also provide recommendations on the addition of lime (for pH) and fertilizer.

Right now is a great time to test — you should have your results in time for a spring application, *if* one is recommended. You'll find everything you need on the UW soil lab website <http://uwlab.soils.wisc.edu/lawn-garden/> (or google "UW soil testing"), including the submission form and sampling instructions.

Keep your lawn healthy and our area waters clean year-round by:

- leaving grass clippings on the lawn
 - selecting fertilizers with no phosphorus (unless your soil test results show it's needed; it's the law here in Dane County)
 - avoiding weed and feed products
 - calibrating fertilizer spreaders correctly
 - keeping fertilizer off paved surfaces
 - choosing fertilizers with at least 25–50 percent of the nitrogen in slow release form
- Sample soil test report, http://uwlab.soils.wisc.edu/files/forms/lag_sample.pdf.

Samples Analyzed By:		SOIL TEST REPORT		COOPERATIVE EXTENSION	
UW Soil & Plant Analysis Lab 6542 Mineral Point Road Verona, WI 53593 (608) 262-4264		LAWN & GARDEN		University of Wisconsin-Extension University of Wisconsin-Madison Department of Soil Science	
Lab Number: 54321	Date received: 8/1/2007	Account: 555800	Client: Bucky Badger		
County: Dane	Date processed: 8/10/2007				
Send to:		Area Type		Lawn/Established	
Bucky Badger		Area Designation		Lawn	
RECOMMENDATIONS					
Lime to Apply					
No soil pH adjustment is recommended.					
Fertilizer to Apply					
Based on the results of your soil analysis, we recommend the following fertilizer program.					
Using the following grid, apply the recommended fertilizers using the spreader setting shown on the fertilizer bag.					
Type of turf fertilizer	May 1-15	July 1-15	September 1-15	October 15-30	Follow rates/spreader settings on the fertilizer bag. A-D: Apply 1 lb actual N/1,000 ft² D: Apply winterizer grade to build K levels for one year then revert to general fertilizer
General high N	A	B	C*	D	
Starter high P					
Winterizer high K				D	
* Skip the September application if you mulch mow.					
Cultural and Management Tips					
Use only fertilizers manufactured specifically for application on turfgrass.					

The Madison Area Municipal Storm Water Partnership is working with the Rock River Stormwater Group to reduce the amount of pollution making its way to our lakes and rivers. The Yahara chain of lakes and the Yahara River both ultimately drain to the Rock River. Both groups thank you for helping to Renew the Rock by reducing stormwater pollution throughout the Rock River area. Learn more at www.myfairlakes.com and www.renewtherock.com.

Rethinking Yard Care

Whether you live in the city or the country, or if your home is large or small, whether you have a lot of time and money to invest in your yard or just a little, there is something you can do to improve water quality. The following suggestions are ways that you can make a contribution to clean water and a healthy environment:

- Leave grass clippings on the lawn.
- Keep fallen leaves out of the street or ditch, using them around the yard as practical.
- Plant an extra tree for multiple environmental benefits, especially where it's part of a planting bed or "naturalized" landscape area that recycles leaves, twigs, and other yard "wastes."
- Seed bare soil and cover it with a mulch as soon as possible to minimize erosion. Disturb no more ground than necessary for a project, while preserving existing vegetation.
- Direct roof downspouts away from foundations and driveways to planting beds and lawns where the water can safely soak into the ground. Use a rain barrel where practical.
- Use lawn and garden chemicals carefully and sparingly. Pesticides, including weed killers, should be considered a last resort – other controls come first.
- Limit the use of toxic or hazardous products in general. Keep them away from storm sewers, lakes, and streams.
- Collect oil and other automotive products preferably for recycling, or tightly seal and wrap them for proper disposal.
- Wash cars on the lawn, where soapy water can't quickly run toward the nearest storm sewer, picking up other pollutants as it goes.
- Keep cars tuned up and in good operating condition. Check for drips and repair leaks immediately to keep nuisance oils off pavement. Better yet, walk, bike or take the bus.
- For waterfront property, grow a "buffer strip" of dense, natural vegetation along the water's edge to filter pollutants and stabilize the shoreline.
- If using a septic tank system, maintain it properly through regular inspections and licensed pumping every two to three years.
- Monitor fuel use from underground gas and oil tanks to make sure they are not leaking.
- Plan your landscape with environmental health in mind, reducing the area that is heavily maintained.
- Clean up pet wastes, from which nutrients and bacteria could be washed toward lakes and streams.
- Conservatively use salt in winter. Substitute sand or old-fashioned "chipping."

Excerpt from GWQ009 Rethinking Yard Care

DNR WT-526-99 <http://clean-water.uwex.edu/pubs/pdf/rethink.pdf>

2016 Garbage and Recycling Schedule

Your waste and recycling materials are collected Tuesday or Wednesday, and should be placed curbside by 6 a.m. If a holiday falls on a Monday or Tuesday, trash and recycling pickup will be Wednesday and Thursday. If a holiday falls on a Thursday, Friday, Saturday or Sunday, pickup will be on your regular scheduled day of Tuesday or Wednesday.

2016 Holiday Schedule

- May 31 pickup will be Wednesday, June 1
- June 1 pickup will be Thursday, June 2
- July 5 pickup will be Wednesday, July 6
- July 6 pickup will be Thursday, July 7
- Sept. 6 pickup will be Wednesday, Sept. 7
- Sept. 7 pickup will be Thursday, Sept. 8

Invasive Plants Are Invading McFarland

Be on the look out for garlic mustard. Garlic mustard can be found in gardens, road side ditches, in our parks and around your homes. It dominates forest floors and displaces most native wildflowers and plants within several years of establishment. Garlic mustard is originally from Europe and was relocated to the United States by early settlers for medical purposes and cooking. It has now spread out of control throughout the east coast and mid-west destroying valuable natural habitats. Garlic mustard is a biennial weed with its seeds germinating in April. The first year plants appear as basal rosettes in summer and remain green during the following winter, making it possible to detect the presence of the plant throughout the year. Second year vegetative growth begins in early spring and blooms are produced in southern Wisconsin from May through early June. Fruits begin to ripen in mid-July and are disseminated through August. Viable seeds are produced within days of the initial flowering and hundred of seeds may be produced by a single plant. The seeds are believed to be dispersed on the fur of animals, wind, birds and simple human foot traffic. Seeds lie dormant for 20 months prior to germination and remain viable for up to seven years. Garlic mustard plants range from 6" to 36" tall and generally have three to four scalloped-edged leaves. The second year plant produces a white flower that will contain fruits that cover the black seeds that will drop in July. Garlic mustard is particularly difficult to control because of its hardiness. Herbicides and hand pulling can be utilized. If hand pulling, never leave the plants on the ground or put them in the compost bin. The seed will remain viable and may get moved around to other uninfected areas. For more information please contact the Public Works Department at 838-7287.
